Acceptance Testing

UAT Execution & Report Submission

Date	21-10-2026
Team ID	
Project Name	Incident Lifecycle Management System in ServiceNow
Maximum Marks	4 Marks

Testcase Analysis: The table summarizes sample UAT results, including passed, failed, and not-tested cases, with severity for issues.

Section	Total Cases	Not Tested	Fail	Pass	Severity of Issue(s)	Section / Validation
Incident Creation	6	1	0	5	—	Portal incident form, mandatory fields, validation and confirmation email
Priority & Assignment	5	1	1	3	Medium (1)	Automatic priority, assignment rules and routing to the right group
SLA Tracking & Escalation	5	1	0	4	—	SLA start, pause, breach alert and escalation
Incident Updates & On Hold	4	1	0	3	—	Agent updates, work notes, In Progress and On Hold with reason
Resolution & Closure	6	2	0	4	—	Resolution notes, user confirmation, reopen and auto-closure
Notifications & Status Tracking	5	1	0	4	—	State-change emails and incident status in the Service Portal
Reports & Dashboards	4	1	0	3	—	Open incidents by priority and state, SLA and workload reports

Security & Access Control	5	2	1	2	High (1)	Role-based access, ACLs and audit history
Total	**40**	**10**	**2**	**28**	**2 issues listed**	**Overall UAT**

Sample Defect / Severity Summary:

Defect / Observation	**Severity**	**Status**	**Suggested Action**
Assignment rule routing issue (sample entry)	Medium	Open / to verify	Check assignment rule conditions and category-to-group mapping.
Unauthorized incident access check (sample entry)	High	Open / to verify	Verify roles, ACLs and record-level access before release.

Sample tally: 28 Pass | 2 Fail | 10 Not Tested | 40 Total planned cases.

Important: Passed/failed values and sample defects are illustrative placeholders for formatting and planning. Keep them only if they match your actual ServiceNow testing; otherwise update the counts and severity after executing each test.
