Acceptance Testing

UAT Execution & Report Submission

Date	21-10-2026
Team ID	
Project Name	Incident Lifecycle Automation in ServiceNow
Maximum Marks	4 Marks

Testcase Analysis: The table summarizes sample UAT results for the incident lifecycle, including passed, failed and not-tested cases, with severity for issues.

Section	Total Cases	Not Tested	Fail	Pass	Severity of Issue(s)	Section / Validation
Incident Creation	6	1	0	5	—	Create incident in the Workspace, caller, short description, Service Desk group, watch list and work notes list
Classification	5	1	0	4	—	Category, subcategory, urgency, service, service offering and configuration item
Knowledge Integration	4	1	0	3	—	Agent Assist suggestions, mark helpful and attach article with comment
Reassignment & Escalation	5	1	1	3	Medium (1)	Reassign to Network, Assigned to clears, CI update and On Hold (Awaiting Change)
Change & Child Incident	5	2	0	3	—	Emergency change request and child incident created from the incident
Resolution	5	1	0	4	—	Probable cause, resolution code and notes, Resolve, parent and child Resolved
Knowledge Creation	4	1	0	3	—	Create Knowledge in the IT knowledge base using the Standard template
SLA & Related Records	6	2	1	3	High (1)	Task SLAs, linked change, child incident and knowledge in Related Records
Total	**40**	**10**	**2**	**28**	**2 issues listed**	**Overall UAT**

Sample Defect / Severity Summary:

Defect / Observation	Severity	Status	Suggested Action
Assigned to not cleared after changing the group to Network (sample entry)	Medium	Open / to verify	Check the assignment group change and confirm that Assigned to clears automatically.
Task SLA not visible to the Level 2 user (sample entry)	High	Open / to verify	Verify roles and record access, and check the SLA definition conditions before release.

Sample tally: 28 Pass | 2 Fail | 10 Not Tested | 40 Total planned cases.

Important: Passed/failed values and sample defects are illustrative placeholders for formatting and planning. Keep them only if they match your actual ServiceNow testing; otherwise update the counts and severity after executing each test.
